BRAUN®

PAXISCOPE-XL

Project your family album life size

Place print on plate

Close lid – print is projected

Projection of croppings

2 YEARS GUARANTEE

**Project your colour prints –
it's as simple as that with the powerful colour print projector.**

With this powerful colour print projector you can easily project photographs, post-cards, charts, texts and many other opaque subjects. The size of the projection plate is 15 x 15 cm so that you can project all standard prints and even postcards.

The operation is very simple. You just open the top cover, place the picture on the glass plate, and then close the cover again. The powerful 300 W halogen lamp and the high-performance special lens Super Paxigon 3.5/280 mm MC guarantee a brilliant and pin-sharp reproduction of your pictures.

For the projection of books or of parts of larger subjects the top cover (pressure plate) can simply be removed.

The PAXISCOPE is equipped with a micro-switch to switch on the lamp when the top cover is closed and to switch off the lamp when the cover is lifted up.

An overheating protection device switches the projector off automatically should the temperature in the unit reach a critical point, i.e. if cooling slots are covered inadvertently.

The powercord is stowed away in a cable compartment underneath the pro-jector.

Technical data:

Projector to project colour prints, post-cards, charts, texts and many other opaque subjects.
Screen Size 15 x 15 cms;
Multicoated Projection Lens:
BRAUN SUPER PAXIGON
1:3.5/280 mm MC;
